

# 2019 DESIGN AND BUILD FOR ONLINE CONTEST

## 1. THE TASK

The 2019 Task is **Put Money in a Piggy Bank**.

The task changes on an annual basis and is determined by Rube Goldberg, Inc.

**NOTE:** Steps, pieces and components from previous machines may be recycled, but the RGMC relies on the ingenuity of students and teachers to create entirely new machines for each year's contest.

### **THIS IS A STUDENT COMPETITION**

- Only students may build the machine.
- Only students may set up the machine.
- Only students may touch the machine (e.g., do interventions, fix the machine, etc.) during the competition.
- People who are not on the team may help transport the machine.

Safety is always the first priority. For scenarios that require building and lifting large pieces of a machine into place, or using tools that require adult assistance, adult help is acceptable.
